1. Binary System and Bonus

The partner can freely choose the side (left/right) on which the customer will be placed. The partner cannot have more than 2 direct customers. All other customers must be placed under another customer in its structure.

Side with higher volume = Power Leg

Side with lower volume = Pay Leg

The commission is based on twice the volume of the Pay Leg

Example:

Left side: 25.000 \$ -> Pay Leg. **Right side:** 32.000 \$ -> Power Leg.

Basis for commission:

2 x volume Pay Leg = 50.000 \$

2. Differential Bonus

The differential bonus is independent of the binary system and bonus.

Personal Qualified Volume (PQV) describes the volume generated by the own team and the further downline subteams.
